

August 10, 2012

To: Jon, Steve & Chris

My husband and I reside in Texas. We wanted a vacation house; either a renovation or a new construction. DKM Custom Homes immediately sensed our vision for our family of 12.

At DKM Custom Homes each partner has a special talent that translates into the home. Steve Dixon has an engineering and design background and supervised each and every step of the structural process. He also has a keen eye in design. Jon Kazak is a man of many talents but the one I appreciate the most is the day in and day out process of keeping the crews working and the project moving and on time. Jon also has a great eye for design and insists that all details are PERFECT. Chris Morrison was supervising another project of DKM but I know that he has the same values.

The communication was excellent and the business side could not have gone better. We have built a number of homes in the Dallas area but we have never worked with builders who had more ethics, more attention to detail and who wanted to make you happy with the end product. They each built our home as if it were their own. Our vacation home ended up to be our DREAM home.

Thank you so much to DKM Custom Homes!  
Vicki and Jim Carter
